

STARTUP PROGRAMME PITCH

UPI made paying invisible. WYSTAK makes the shop visible again.

Loyalty and event passes in Apple Wallet and Google Wallet. No app, no plastic, points that update seconds after a visit.

Abhishek · Harsh · Kushagra · Parv

THE PROBLEM

India digitised the payment, not the relationship

PAYMENT APPS

Paid, then forgotten

People pay everywhere by UPI, but the business is one line in the history. No brand, no reward.

SOCIAL MEDIA

Pay to be seen

Where most phone time goes. Brands pay for every post, in a feed full of rivals.

LOYALTY TODAY

Lost, muted or ignored

Paper cards get lost, apps go uninstalled, and WhatsApp offers cost money per message.

Every payment is digital now. The loyalty, rewards and experiences that should follow it still aren't.

THE SOLUTION · THE RELATIONSHIP LAYER ON TOP OF UPI

Your brand, on every customer's phone

01 Add once

Scan the business's QR and add its pass to the wallet. No app.

02 Earn on every visit

Rewards bring customers back more often, with bigger baskets.

03 Notify for free

Updates land on the lock screen, with no cost per message.

04 The business learns

Who comes back, who stopped, and when.

[Placeholder: our demo pass goes here]

The solution · a direct line from every business to its own customers

THE PRODUCT

Two pass types at launch. One issuing system.

LIVE AT LAUNCH

Loyalty pass

Points per bill or stamps per visit. The balance updates on the lock screen seconds after a scan.

Cafés · bakeries · salons · retail stores

LIVE AT LAUNCH

Event pass

A ticket that pops up on the lock screen at the door and scans even with no signal.

Fests · society events · gigs · club nights

LATER: INNOVATIONS ON THE SAME RAILS

Geo-location alerts

Memberships

Collectible cards

Offers and win-backs

Event and expo ID passes

Experience cards

NFC tap

From scan to lock screen in thirty seconds

[Demo video: drop the screen recording here]

Sip Grove Juice Bar demo pass, Apple Wallet and Google Wallet

- 0:00 Customer scans the counter QR
- 0:08 Adds the pass to their wallet
- 0:18 Staff scan the pass at checkout
- 0:25 Points update on the lock screen

What the owner sees · design mockup, example data

WHY NOW

Both wallets are arriving just as feeds get crowded

Google Wallet came to India

Launched May 2024 with loyalty cards and event tickets built in.

Apple Pay arrives in India

Launching October 2026 with Axis Bank, putting Apple Wallet in daily use on iPhones.

UPI made payments invisible

The merchant's brand vanished from checkout. A pass puts it back on the lock screen.

Social feeds are crowded

Every shop is paying for the same feed. The wallet is a new, uncrowded way to market.

Privacy law is arriving

DPDP enforcement begins around May 2027. Consent has to be built in, not bolted on.

UNIQUENESS

What makes WYSTAK different

No app to install

Lives in Apple Wallet or Google Wallet, already on every phone.

Updates in seconds

The balance changes on the lock screen right after the scan.

Free lock-screen notifications

Reach customers on Apple and Google Wallet with no cost per message.

Works offline

The scanner keeps working without internet and syncs later.

One link, both wallets

One QR spots iPhone or Android and adds the right pass.

Compliant by design

We never hold customer money. DPDP consent in English and Hindi.

THE VISIBILITY GAP

UPI made the merchant invisible. The wallet brings them back.

PAYS BY UPI

Sees PhonePe or Google Pay

The café becomes one line in someone else's app. The payment app is the billboard, not the shop.

ORDERS ON AN AGGREGATOR

Sees Zomato or Swiggy

The platform keeps the relationship and charges 22–25% commission.

CARRIES A WYSTAK PASS

Sees the shop, every day

The shop's own brand on the lock screen, updating after every visit.

Visibility the shop owns: no ad spend, no commission, no app to download.

MARKET SIZE · TAM, SAM, SOM

₹983 Cr of shops, ₹180 Cr within reach, ₹12.9 Cr to win

TAM · TOTAL

≈ ₹983 Cr / yr

5 lakh restaurants + ~46,500 gyms × ₹17,988 a year, before salons and retail.

SAM · SERVICEABLE

≈ ₹180 Cr / yr

1,00,000+ outlets on one POS partner's network (Petpooja) × ₹17,988.

SOM · OBTAINABLE IN 3 YEARS

≈ ₹12.9 Cr ARR

~3,100 merchants by month 36, about 3% of those outlets. A model, not a forecast.

BUSINESS MODEL

How we'll make money

To be finalised

OPTION

Monthly subscription

₹[__] / month

Per outlet, for loyalty passes

OPTION

Per event pass

₹[__] / pass

For organisers, with sponsor-funded campus fests

OPTION

Setup and design

₹[__] one-time

Branded pass design and onboarding

Our rules either way: a clean technology fee with GST, never a share of the bill, and never holding customer money.

GO-TO-MARKET

Built for India's independent shops

Visits or points

Cafés and bakeries

Stamps or points replace the paper card: one more visit for a free coffee.

Visits or points

Salons

Every fifth visit on the house, or points on every service, tracked on the pass.

Visits or points

Retail stores

Points on every bill or a reward every few visits, shown on the lock screen.

Event passes

Campus life

Fest day-passes that pop up each morning and scan offline at every gate.

STEP 1 · BY HAND

Win one neighbourhood at a time, city by city.

STEP 2 · REFERRALS

Shops that see a neighbour's pass ask for their own.

STEP 3 · PARTNERS

POS partners like Petpooja (1,00,000+ outlets) sell for us.

COMPETITION

The big players keep the customer. We hand it back.

PAYMENT APPS

PhonePe · Google Pay · Paytm

Rewards live in their app and build their brand, not the merchant's.

AGGREGATORS AND DEALS

Zomato · Swiggy · magicpin

Platform memberships and commission.
The platform keeps the customer.

SMB LOYALTY AND CRM

**Reelo · Petpooja Loyalty
· DineOpen**

Built on WhatsApp and SMS blasts, not a live pass in the customer's wallet.

ENTERPRISE LOYALTY

Pine Labs · EasyRewardz · Twid

Wallet programmes for national brands.
They won't sell to a ₹1,499 café.

TICKETING

BookMyShow · District

Big venues and concerts, not fests,
society events or club nights.

GLOBAL PASS TOOLS

Passcreator · PassKit · PassNinja

Pass files only. No India POS, offline scanner or DPDP and GST handling.
